

## Family Assistance Apps (25)

 <p>About my day</p>	<p>About my day allows caregivers, family members and health-care professionals to make notes about the daily events and experiences of an individual with whom they are working throughout the day. This app is designed to replace paper journals that are often carried in a binder by the individual as a means of sharing information among family and support workers who work with that person.</p>	<p>Free</p>
 <p>Abilipad</p>	<p>“the WRITE TOOL for the iPad” was developed by an occupational therapist to facilitate writing. The Keyboard Creator lets one design keyboards using letters, words, sentences or pictures with custom key sizes, fonts, colors and audio recordings. The notepad offers word prediction to assist with spelling and to reduce keystrokes, as well as text-to-speech that allows one to hear what was written in order to correct spelling and grammatical errors</p>	<p>9.99</p>
 <p>First Then Visual Schedule</p>	<p>First-Then Visual Schedule application is designed for caregivers to provide positive behavior support for those with communication needs. This application provides an affordable and convenient audio-visual prompting tool for use on the iPhone or iTouch. The portability of the iPhone and iTouch and ease of use of the application make it perfect for use at school, home or in the community.</p>	<p>9.99</p>
 <p>iEarnedThat</p>	<p>Designed by a Pediatrician and parent, iEarnedThat is an amazingly simple motivational tool to help children develop desirable behaviors by working towards tangible goals. Turn any picture of a desired reward into a 3D interactive jigsaw puzzle of up to 60 pieces! Set the goal and have your child EARN their reward one puzzle piece at a time.</p>	<p>1.99</p>

 <p>iPrompts</p>	<p>iPrompts is a picture-based prompting app for the iPhone, iPod Touch and iPad It is used by parents, special educators and therapists with developmentally challenged and language-impaired individuals, like people with Autism, Down syndrome, Fragile X syndrome, and apraxia of speech. The app includes picture schedules where you can create a schedule out of pictures, a visual count-down timer so an individual knows how much time is left for a specific activity and choice prompts where a caregiver can provide images and an individual can choose the item they want.</p>	<p>49.99</p>
 <p>Behavior Tracker Pro</p>	<p>Behavior Tracker Pro is an iPhone, iTouch and iPad application that allows Behavior analysts, therapists, aides, teachers or parents to track behaviors and graph them. With the app you can record video of behaviors or interventions to later review with parents, teachers or therapists. (must have iPhone with video camera). Upload your data to our secure Team Portal for advanced online charting, team collaboration, video messaging, document management and more!</p>	<p>29.99</p>
 <p>Autism Track</p>	<p>AutismTrack is a journaling tool that empowers caregivers of those with autism to easily track interventions, behaviors and symptoms. Checkboxes allow daily recording of any therapy, medicine or diet. Simple “sliders” allow rating of any behavior or symptom (e.g., eye contact, aggression and echolalic speech). Daily log screens provide a snapshot of any particular day’s interventions and behaviors. Users may also graph symptoms and monitor compliance over periods of time.</p>	<p>49.99</p>
 <p>Look2Learn AAC</p>	<p>Look2Learn (L2L), a revolutionary AAC software application for the iPod Touch, iPhone, and iPad allows individuals to work at their communicative level using photographs to express wants and needs. The easy to use system integrates preloaded vocal output so that individuals can use their “voice”. In addition, users are able to record their own personalized audio and pair it with photos! This is a good app for beginners not willing to shell out more money. One thing to concerned about is that the app can only hold 140</p>	<p>14.99</p>

	pictures	
 <p>Voice4U</p>	<p>Voice4u, is a revolutionary AAC (augmentative and alternative communication) application that helps individuals to express their feeling, thought, actions and things they need. It is a perfect solution for learning and communication for autistic individuals and people around them. With it, you will never have to guess at an individuals' wants and needs and will break down the barriers of communication for individuals with special needs. Two complaints about Voice4U are that the illustrations are not the best and that you are limited to 9 categories.</p>	29.99
 <p>Week Planner for Kids</p>	<p>Week Planner for Kids helps children from the age of 3 to learn the structure of the day and week though the use of recognizable icons. By using this app, they quickly learn to comprehend what week routines there are and what special activities are planned. Your child learns to plan and make choices in a playfully way.</p>	1.99
 <p>myIEPmeeting</p>	<p>myIEPmeeting helps parents and guardians effectively participate in their student's Individualized Education Program process. Organize and gather information, Monitor child's progress and Give Access on a mobile device to help maintain support. Tools include: Before, During and After checklists and questions to help gather and organize information for your IEP meeting; Behavior Tracker and Monitoring</p>	5.49
 <p>iSpeech</p>	<p>Developed in conjunction with a licenced speech pathologist, iSpeech is an excellent tool for teaching and practicing speech therapy at home. Wrapped up in a fun and attractive user interface, sounds are organized by the ages at which they should have developed, giving you benchmarks for where your child should be developmentally. Any problem sounds can then be selected to display the teaching information for that sound</p>	3.99

 <p>TapSpeak Button</p>	<p>TapSpeak Button for iPad modernizes the idea of a mechanical switch that records and plays messages. We have taken the idea and extended it to provide a portable, convenient, and stigma-free tool to use for basic teaching and communication tasks. Speech Language Pathologists, parents, Physical Therapists and Occupational Therapists can all make use of our line of products. TapSpeak Button is especially useful for teaching cause and effect relationships.</p>	<p>24.99</p>
 <p>Verbally</p>	<p>Verbally is an easy-to-use, comprehensive Augmentative and Alternative Communication (AAC) app for the iPad. Verbally brings speech to those without and enables real conversation with its simple, intuitive design. Just tap in what you want to say and Verbally speaks for you. Premium Features available with an in-app purchase.</p>	<p>FREE</p>
 <p>ParentLink</p>	<p>The ParentLink app gives you a personalized window into what is happening at your school. View district and school news, and receive information from the district.</p>	<p>Free</p>
 <p>Remind101</p>	<p>Remind101 provides a safe way for teachers to text message students and stay in touch with parents. It is 100% free and is used by over 700,000 teachers, students, and parents to send millions of messages every month.</p>	<p>Free</p>
 <p>PowerGrades</p>	<p>See live assignments, grades, scores, and more, right from the teacher's grade books. Now both students and parents have quick access to PowerScool with this convenient app.</p>	<p>.99</p>
